APP DEVELOPMENT

1

Step 1 – Share and improve your app with user feedback: Learn that apps can help people.

Sort App Icons into Helpful, Learning, and Entertainment piles
https://tinyurl.com/4xspw643

2

Step 2 - Discover how apps can be used "for good": Learn what decomposition is and apply it to your app idea.

Decomposition Rocket
https://tinyurl.com/45xuv7e6

3

Step 3 - Decompose the needs of your app user: Draw your app idea screen.

Design your app on Blank App Screens
https://tinyurl.com/mdy82ps2

4

Step 4 – Design your app screens: Include an event in your app.

Learn about Events and draw a new screen to show one.
https://tinyurl.com/m9f7xuek

5

Step 5 – Create algorithms for your app that include events: Get feedback on your app idea and brainstorm how you could improve it.

Get feedback on your app idea and brainstorm how you could improve it.
