

Caterpillar Parts

BUG FUN

Find the Location of the Parts

- Head – Where the eyes, mouth, and antennae are
- Eyes – Tiny spots that help the caterpillar see light and movement
- Mouth – Used for chewing leaves
- Thorax – The middle part of the body with 3 pairs of legs
- True Legs – The front 6 legs used for walking and gripping
- Abdomen – The long back part of the body
- Prolegs – Soft, stubby legs on the abdomen that help with crawling
- Spiracles – Tiny holes along the sides used for breathing
- Spinnerets – Silk-spinning parts near the mouth used to make threads
- Horn – Dorsal projection to help camouflage or frighten predators.
